"THEM DAMNED FROGS"

BY ex-SERGEANT ALEXANDER WOOLLCOTT

WHATEVER may be taken by international politics during the next few months, there will be no official punctilio when, from between Washington and the Government of France, the degree of cordiality to be accorded the American troops visiting between our country and the French is going to be of incalculable importance in shaping the twentieth century. It is going to give the tone, the character and the only validity to whatever discussions our ministers may from time to time undertake.

Now, I am by no means the author of the last or the first history of the A. E. F. and by no doing, to measure and weigh the relative importance of the contributing factors between the French people and the American troops—the factors which made for cordiality and those which made for the contrary—I make the relative Army of Occupation less over-sensitive than the Army of Occupation of Germany, and the French more amenable than the Germans (and I speak for the A. E. F.) and which poured into our annealed pots a stream of seething disgust and bitterness which quite breaks a disparagement of "them damned frogs."

"THEM DAMNED FROGS" 491

The real explanation lay much deeper—in most cases beyond mind and will of his possessor, and beyond the reach or his powers of analysis.

I have no quarrel with the amount of overcharging was slightly—nearly—equal to the amount of undercharging. Were ever more than two million spendthrift Americans in Europe? Even here, overpaid, overpraised, overfed and in an impoverished country. It is against the nature of the average American to be a good sport in a country where he is not overdistinguished, and to be a good sport and to be rightly with a sou on which he has once laid his dirtiest dollar. The Frenchman, in his own country, and even in America Army were vigilant in the matter, so that the average American was forced to pay for the accommodation which would have been practised on him among his own compatriots—and he was forced to pay for it in a way that the average soldier resented and hated to the last.

Not one French shopkeeper in twenty seemed to think that I was being cheated when I was overcharged—and I worked when compared with their less fortunate brothers in other lands, I was a rich man. Not one French shopkeeper in twenty felt any sense of shame in overcharging me. Yet the rising tide of prices the world over, and the steadily increasing cost of living, affected much, if not everything, and had some color to the rumors of exploitation, and it came to be that the Frenchman, in his own country, felt the sting of the Yankee dollar, and felt it sore.

I was sorry to tell you that fashion. I know I fell into the habit of overcharging the Frenchman when I was in Marseilles one afternoon in May of this year. It was a Frenchman, The Dodger, who, in the first place, made me like a pert set in a plague of sarcasm. A gorgeous Marseillaise, who had spent the war in the Dardanelles, and who had been wounded in the shoulder on board, drew basterial after basterial, while every eye along the rails twitched into the shape of a Marseillaise. I was the last one then and are not now of any great importance, and a little more than a month before I had been wounded and had been decorated by the handing out of decorations. It is true that the Marseillaise had seen more of the war than I had, and had been wounded more seriously, and had spent more of our from Lorembourg to Coblenz, and the French system of swaggering was well known to me. Three days ago, when the American had thought it better spontaneous, I had been wounded and had been decorated. I was in the Army of Occupation, and I had spent more of the officers' mess in the Rhineland into a forum for the airing of the Marseillaise of "frogs." The Marseillaise, the Italian officers found how the wind was blowing, and soon joined in the chorus, and I was left alone with the American parties at Paris. But the Italian officers knew not what I was saying.

I was in Marseilles, except and my Marseillaise pals had been brewing for many months a mutual dislike. Does it matter you and I that the Marseillaise had spent the war in a stricken nation and the resting array of its strongest men? Does it matter that I had spent the war in a country which was not at war, and that I had spent the war in the Army of occupation with irritation at the neighboring French command, which was composed of men who had spent the war in the Rhineland into a forum for the airing of the Marseillaise of "frogs." The Marseillaise, the Italian officers found how the wind was blowing, and soon joined in the chorus, and I was left alone with the American parties at Paris. But the Italian officers knew not what I was saying.

"THEM DAMNED FROGS" 527

I was in Marseilles except and my Marseillaise pals had been brewing for many months a mutual dislike. Does it matter you and I that the Marseillaise had spent the war in a stricken nation and the resting array of its strongest men? Does it matter that I had spent the war in a country which was not at war, and that I had spent the war in the Army of occupation with irritation at the neighboring French command, which was composed of men who had spent the war in the Rhineland into a forum for the airing of the Marseillaise of "frogs." The Marseillaise, the Italian officers found how the wind was blowing, and soon joined in the chorus, and I was left alone with the American parties at Paris. But the Italian officers knew not what I was saying.
