## NOSE-BOBBING:

MIRACULOUS OPERATION

BRINGS HAPPINESS

TO HUNDREDS

**1** **NOSES** different from average sometimes (especially to sensitive youths) cause owners embarrassment, are handicaps in certain careers. Young man (left) felt his nose a hindrance

**2** **NEW NOSE** (right) is pleasing to its owner, who feels it was worth going through operation! It is example of wizardry of surgery. Many think about having their noses remade, some are doing so

**BORN WITH A BEAKED NOSE** 23 years ago, young man considered it an affliction, became self-conscious about it. Above: Close-up of nose

## NOSE JOB

**"NOSEY" WAS HIS NICKNAME** in school, tacked onto him by his school-mates. Above: Doctor injects anesthetic solution into tissues of nose

**SCHOOLBOY JIBES** were forgotten, but when girls laughed at him, it hurt. Above: Severing the cartilage from nasal tip with special knife

**GIRL-SHY**, unhappy because of his nose, the lad decided to take drastic measures. Above: Nasal hump is extracted through the nostril

**HE DIDN'T CARE WHAT HAPPENED**, he told the doctor. Below: Further stage in removal of the hump, consisting of bone and cartilage

**HUMP IS REMOVED** and with preliminary cutting through the bone with a saw-like instrument, the bridge of nose is narrowed by finger pressure

## N O S E J O B

**THE LAST STITCH** has been taken as this picture was snapped, and the suture (thin, sterilized catgut) is brought together for cutting

**SURGICAL OPERATION** is completed. Nostrils are spread, gauze packing removed. (Packing was to prevent secretions entering throat.)

**AFTER OPERATION** (below). A splint is attached for 48 hours to prevent after-swelling. Will the "new nose" make him happier?
